1 Understanding the Council's purpose and direction

1.1.13 Helping others understand purpose

1 Understanding the Council's purpose and direction

1.2.10 What demand is

2 Understanding and managing demand

1.2.11 How my service meets demand

If you and your manager are unsure which Level of the Capability Framework your post is aligned to, the easy way to check is to log into your CR&D (in CoreHR) and have a look at the 'Knowledge, Skills and Behaviours' sections.

When you go in you'll see a screen similar to the one opposite. Each of the 'Skill Sets' have a number, if these number references start with a number '1' then you are in Capability Framework Level 1 for all parts of the Capability Framework. If the number references start with a number '2' then you are Level 2 etc.

Highlighted in the example here you can see that the first Skill Set ref No. is '1.1.10 ...' which means that they're Level 1 (FYI - all Skill Sets for this person will start with the number 1).

If you see that the Skill Set numbers start with a '3' e.g. '3.1.11' then look no further, you're Level 3!

If you're not sure how to access your CR&D, click [HERE](#) which takes you to the CR&D pages on People Anytime.
